

DiGidot Easy Connect

The most efficient connector

The DiGidot Easy connect is the most efficient connector for dynamic lighting controller on the market! It replaces complex installation boxes and makes installation and assembly up to 5 times faster and more safe!

The DiGidot Easy Connect

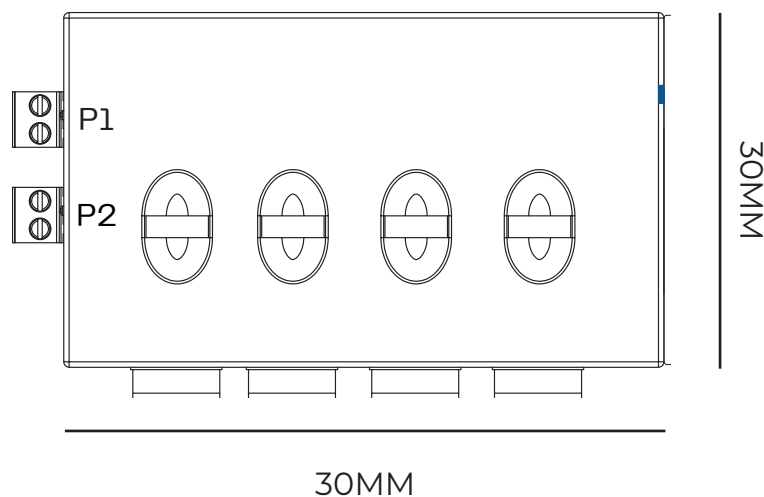

Forget cables and complicated installation boxes

The DiGidot Easy Connect stands as a testament to innovation and simplicity. This revolutionary device seamlessly integrates into any DiGidot controller, transforming complex installation processes into a breeze and elevating lighting management to new heights of efficiency and control.

Eliminating the need for complex installation boxes, simplifying the process and saving time. With only two power inputs and automatic switching capabilities, you can connect multiple LED fixtures with ease. This streamlined approach reduces cable clutter and ensures a faster, more efficient installation. Each output features four replaceable fuses, providing robust protection against short circuits and other potential hazards.

Four status LEDs provide clear indication of power status for each output, enabling you to quickly identify and address any potential issues. This real-time insight fosters proactive maintenance and ensures seamless operation of your lighting system.

The DiGidot Easy Connect represents a paradigm shift in lighting control, introducing a level of simplicity, efficiency, and protection that has never been seen before. This revolutionary device empowers technicians and facility managers to streamline installations, enhance safety, and gain unprecedented control over their lighting systems.

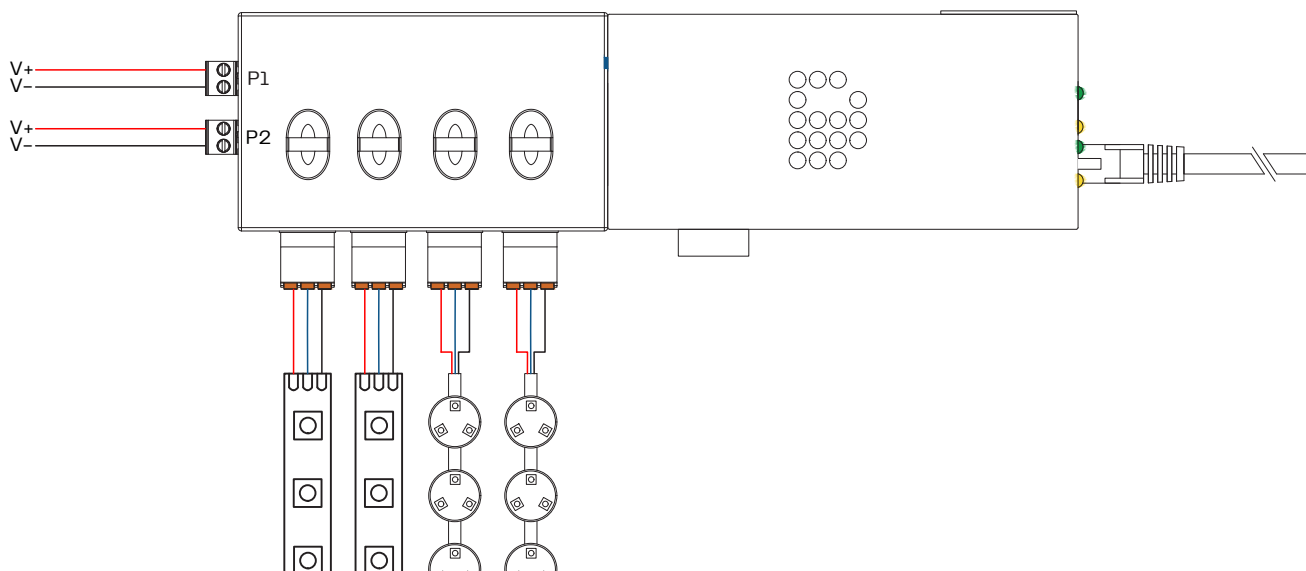

Embrace the future of installation and lighting control with the DiGidot Easy Connect and experience the transformative power of innovation.

Key Benefits of the Easy Connect

The DiGidot Easy Connect is the perfect solution for technicians who work with a DiGidot controller.

Work more efficient

The Easy Connect has only two power inputs, which are automatically switched. This means you need to lay fewer cables, making installation and assembly simple and fast.

Better protection

The Easy Connect has four swappable fuses for each output. These fuses offer additional protection against short circuits and other fault conditions.

Easier maintenance

The Easy Connect has four status LEDs that indicate whether the output is under power. This makes maintenance of your lighting installation easier. Making the DiGidot Easy Connect the ideal choice for technicians who want to work more efficiently, safely, and easy.

Specifications

- Replaces complex installation boxes
- 2 power inputs (automatically switched)
- Delivers up to 30 amp (globally) *40 amp for EU
- 4 combined power/data output
- 4 swappable fuses (each port)
- 4 status LEDs
